CalmStudio Desk

FREELANCE BUSINESS DASHBOARD

Welcome to CalmStudio Desk. Let's run your studio *calmly.*

Thank you for your purchase. You'll be looking at your dashboard in about a minute. There's no account, no subscription, no bank connection and nothing to install.

On your computer

1. Unzip the download, then move **CalmStudio Desk.html** somewhere it will stay, such as Documents. Don't open it from inside the zip.
2. Double-click it. It opens in your web browser.
3. Bookmark it so it's one click away.

On your phone or tablet

1. Open your private link (below) in Safari (iPhone/iPad) or Chrome (Android).
2. iPhone: Share → **Add to Home Screen**. Android: ⋮ → **Install app**.
3. CalmStudio Desk now opens like an app and works offline.

YOUR PRIVATE LINK

[run make-guide.js with your link]

Even on the link, your numbers are saved only on your own device. Nothing is uploaded. Please don't share the link; it's part of your personal licence.

Your first minute

1. **Settings**: add your business name, pick your **currency first** (it locks once money records exist) and set your tax reserve rate.
2. **Clients → Projects**: add a client, then a project with a budget and due date. Add tasks right on the project card.
3. **Time**: pick a project and press **Start timer**. Stop and save logs the hours to that project.
4. **Invoices**: create one, then press **Payment** to record full or partial payments. Overdue ones are flagged for you.
5. **Tax reserve**: log expenses by category and watch the reserve estimate update.

Just exploring? Settings → **Open sample workspace**. The sample never touches your own data.

The one rule: your data lives in your browser

CalmStudio Desk saves automatically, privately, on this device only. So **use the same browser each time** and **export a backup weekly** (Settings → Export backup, or the Export button in the top bar). **iPhone:** Safari can clear website data you haven't opened for about a week, and private tabs erase everything when closed. Adding CalmStudio Desk to your Home Screen and backing up weekly keeps your records safe.

Good to know

What's inside

- **Studio at a glance**: collected, outstanding, tax reserve, net cash, 6-month cash trend, studio pulse rings, next tasks, upcoming events, active projects
- **Calendar**: month view with tasks, events and invoice due dates. Tap any day to add a task or event
- **To-dos**: open, overdue, today, done; priorities and repeating tasks
- **Projects**: client, budget, due date, status, cover image, progress and tasks
- **Clients**: Lead, Active and Past with notes
- **Invoices**: full and partial payments, overdue flags, charts, print or save as PDF
- **Events**: meetings, calls, deadlines, personal blocks, repeating
- **Time**: focus timer and manual entries
- **Tax reserve**: categorised expenses, profit & loss, reserve estimate
- **Settings**: 10 currencies, 6 colour palettes, light & dark, backup & restore, privacy blur

Works with

Chrome, Safari, Edge and Firefox on Mac, Windows, Chromebook, iPhone, iPad and Android.

Troubleshooting

"My records are gone!"
You probably opened CalmStudio Desk in a different browser or moved the file. Open it the way you did before, or restore your latest backup.

New phone or computer?
Old device: Settings → **Export backup**. New device: open CalmStudio Desk → Settings → **Restore backup** and pick that file. There is no automatic sync; that's what keeps your data private.

How do I save an invoice as PDF?
Invoices → the print button → choose "Save as PDF" as the printer.

Can I change the look?
Use the palette menu and the Light/Dark button in the top bar, any time.

Showing your screen?
Settings → **Toggle privacy blur** hides amounts.

Updates

New versions appear in your Etsy purchases. Before switching, export a backup from your current copy, then restore it in the new one.

Not professional advice. CalmStudio Desk is a business planning tool. Tax reserve figures and invoice totals are estimates based on the numbers you enter. It is not financial, legal or tax advice, does not connect to any bank or accounting software, and does not move money.

Thank you

Thank you for choosing CalmStudio Desk. We hope it gives your freelance business a little more calm and clarity. If it has helped you, an honest review on Etsy helps other freelancers find it, and it means the world to a small studio like ours.
